

EXECUTIVE LEADERSHIP AND DELIVERY CAPABILITY

Strategic leadership for your company's next stage.

We join your leadership team to set the priorities that will evolve the business and drive their execution with internal leaders, partners, and the capabilities the agenda requires.

WHERE THE COMPANY STANDS

Decisions that shape what comes next.

The opportunity emerges when the business has a clear next stage and needs leadership to make it happen.

01

Growth and expansion

Assess whether processes, systems, and teams can support new markets, channels, or a higher volume of operations.

02

Investment decisions

Decide what to change, where to invest, and how to evaluate alternatives when several initiatives and vendors are involved.

03

Organizational maturity

Develop leaders, delegate decisions, and establish clear accountability as the company evolves.

HOW WE WORK

01 · CLARITY

Strategic assessment

We understand the business, assess options and capabilities, and agree on priorities with leadership.

2 to 3 weeks

02 · LEADERSHIP

Fractional executive leadership

We lead decisions, teams, and outcomes with a defined mandate and time commitment.

Initial engagement of at least 3 months

03 · DELIVERY

Capabilities to move forward

We work with existing leaders and vendors, bringing in KinergyLabs specialists or teams when the plan requires them.

Capacity tailored to each initiative

What the company receives

A 90-day executive agenda with priority decisions, owners, dependencies, and progress indicators. Investment estimates are included when the available information supports them.

FROM AGENDA TO DELIVERY

The capabilities needed to move it forward.

Consulting, development, and team augmentation to build what the business needs.

01

Product and user experience

Define solutions, prototype them, and validate decisions before expanding the investment.

- Product ideation and priorities.
- UX design, prototypes, and iteration.

02

Software, integrations, and cloud

Build applications and connect systems to support the evolution of processes and channels.

- Web, mobile, backend, and platforms.
- Integrations, QA, deployment, and cloud.

03

AI and automation

Apply AI to real processes where it creates value, with controls and measurement.

- Discovery and impact-based prioritization.
- Prototyping and traceable implementation.

04

Specialists and squads

Expand delivery capacity with individual roles or teams working against an agreed agenda.

- Specialists for existing teams.
- Squads accountable for deliverables.

One agenda, different engagement models.

90-day transformation, interim leadership, or CEO and board advisory. The model is defined by the company's stage, mandate, and internal capability.

Clear responsibilities.

When KinergyLabs capabilities are added, the implementation has its own scope, budget, and owners. The company may also engage us directly for an initiative.

DECISIONS WITH BUSINESS IMPACT

Experience to lead. Capability to deliver.

High-availability financial platform

100+ financial institutions

Operational accountability for a critical banking platform and leadership of an organization of more than 45 people.

Enterprise banking portfolio modernization

Nearly 90 applications

Business and technology assessment to guide remediation, consolidation, replacement, and retirement decisions.

Regulated regional fintech

Three countries and portfolio sales

Capabilities for recurring loan portfolio sales with independent assurance and a platform with 99.95% API availability.

AI-powered compliance

Weeks reduced to under a day

A multi-agent platform with controls and auditable evidence; cloud migration in four months with no customer-visible downtime.

WHO LEADS THE WORK

Javier Fradiletti

Computer Engineer and founder of KinergyLabs. His background combines product and operations leadership with deep technology expertise. He leads the executive mandate and connects every business decision with the capabilities and people required to deliver it.

Let's talk about your company's next stage.

What you want to achieve, which decisions are still open, and which capabilities you need to move forward.
